## Creating a Unique Garden

By Joyce Hallbauer, 2002 MG

Maybe your yard is small and bland or full of concrete and hardscape. Or you have a large boring yard full of flat surface and grass. Even worse is a yard with slopes and low spots. So what can one do when one wants to garden but there's no place to do it? Mini gardens could be the answer. They can break up large flat expanses, fit in small spaces, add interest on stairs, create island gardens and soften hardscape. It takes a little more imagination and resourcefulness but the reward is a very unique landscape.

Do you have straight, plain concrete walkways? Soften the harsh lines and create a pleasant, natural path with a nice, curving garden along the edge. Any solid surface can hold soil including concrete, gravel or pavers. Edging probably will be necessary for the soil to be deep enough to plant unless only moss is used to form a ground cover.

How about using old patio tables, large rocks, wagons and wheelbarrows? All are common objects that can be used at the end of a useful life. Crates, platforms of any kind; lamp tables, tree stumps and even logs can be given new life by making them into beautified focal points in your yard. They are all perfect mini garden planting areas once they are placed and prepared properly.

The easy way out is using planters atop them but if you want a challenge, try using soil and grow the garden on the surface itself. For most walkways and tables it's as easy as putting down at least four inches of potting mix with water retention granules to cover the area you want to plant. If there's

(Continued on page 2)

enough room to berm the soil, larger plants can be used otherwise stick with smaller plants. On small tables or on other surfaces, an edging of some sort will again be needed. Only your imagination limits what you use—broken glass, driftwood pieces, small rocks, etc.

If a perforated metal patio table is used, just be sure to cover it with plenty of newspaper before adding the soil.

The last question is what to plant in these mini gardens. Depending on the soil depth anything from cactus to small trees and shrubs can be planted.

Four inches of soil will be plenty for moss, ferns, succulents, shallow rooted grass, hardy ground covers, and bromeliads. In nine inch soil plant herbs and vegetables, vines, leafy medium size plants with longer roots. The small trees and dwarf shrubs will grow well in 16 inches of soil. Some like Nandina, Rosemary, and Japanese maples will do just fine.

Of course, the location will help determine the plant choices—sun, shade or both; as will the wind and weather exposure. Start by planting the outer edge with small plants then place the larger ones behind them or in the center of the surface. Once

planted, water and fertilize like a potted plant. Every few weeks fertilize with diluted liquid, and water as needed to keep moist until they are established. Add a few extra elements of interest (little rocks, or really small pots) to enhance the garden and don't forget to prune plants as needed to keep them in their space as they grow.

With a lot of imagination, whole scenes can be recreated in your mini garden: sticks become fences, sand and pebbles become streams and moss looks like grass. Just let your love of nature go wild. Finally, sit back and enjoy your creation and be sure to share pictures with family and friends.

## President's Message

### **Pumpkins, pumpkins everywhere!**

My favorite season of the year. The weather is cooler, the garden and flower beds are cleaned up. Plants have been dug up, divided, replanted or shared with others. The gardening chores are winding down for winter. We have made it through another Texas summer.

What a time to be thankful! I am so grateful for family, friends and all the Master Gardeners that I have had the opportunity to spend time with this year.

Each one is such a wealth of knowledge, I am constantly learning and appreciating the wisdom you share. Working and sharing as a team is what makes our Master Gardener Association the Biggest and the Bestest!

Thank each of you for all your hard work and dedication!

I look forward to an even bigger and better year in 2016!

**Marilyn Satterfield  
TCMGA President**

# TCMGA PROJECT FEATURE:

## THISTLE HILL

By Patsy Miller, 2010 MG

Fort Worth historic home Thistle Hill is a testimony to a bygone era and Tarrant County Master Gardeners play an important part in keeping that history alive.

Located at 1509 Pennsylvania Ave on Fort Worth's near south side, the 1904 mansion was one of several large homes built by early cattle barons in an area known as Quality Hill. Nowadays it sits next to Cook Children's Hospital. Instead of horse-drawn carriages passing in front, the serenity of the majestic columned home and expanse of lawn is occasionally pierced by screaming ambulances and humming helicopters overhead.

"To me it is like being in the country," says Project Lead Sue Fair. She started volunteering in 2010 as an intern and worked her way up to project lead. MGs take care of the planted beds, some of which include 100-year-old roses. Sue has a diagram of the original beds and plantings and is trying to include as much of the original plants as she can.

The beds along the west side are not original. Sue says they were added around the early 1990s. A young girl won a contest and she used her winnings to landscape that area.

Thistle Hill, the first Fort Worth home to earn the Historic and Cultural Landmark designation in 1978 and named to the National Register for Historic Places in 1975, is a popular site for weddings and other events. Master Gardeners play an important part in keeping the grounds "picture perfect" for the many photographs that are taken in the gardens. Thistle Hill staff looks to MGs for advice on the landscaping.

# Thistle Hill—cont'd

It is not all about working in the garden. Sue and her volunteers recently made a presentation on the perennial Cashmere Bouquet to a group from Allen who was touring the mansion.

Each month the volunteers have an educational program – most recently on composting – turning their pruning into valuable compost.

Volunteers are always needed. The work day is each Wednesday, 9 a.m. –noon. Hours may vary according to the season. For more information, contact Sue Fair at [lsalfair@sbcglobal.net](mailto:lsalfair@sbcglobal.net) or 817-284-7392

# SCHOOL SEEDS

By Claire Alford, 2005 MG & Propagation Specialist

Isn't life great being a Tarrant County master gardener? You may have an idea how to educate the public about gardening but many times it is another master gardener or one of the projects that help you find your "spot". In 2009, at the Resource Connection Demonstration Garden hoop house, we had plants that were to be delivered to a project that fell through. While talking with Eleanor Tuck and Susan Stanek I asked if we could contact the school projects to see if they could use the tomatoes and herbs. Thus began the wonderful project of School Seeds.

That next year, Sharon Chastain, lead master gardener of Alice Carlson at the time, asked if our propagation team would help cut the cost of their buying fall vegetables. She supplied seeds and our team started, bumped them up, fertilized them, and happily helped load them in her car for transport.

In 2011 she asked if we could start a plant for each child in the school to plant. That was about 400, four inch pots. What a project! They had plants in every bed of the school. Even around the flagpole. Students measured them even researched what insect was eating their plant and wrote thank you notes to the master gardeners about their plants.

Fitzgerald, Heritage, and Durham have participated almost every year as well as a few other projects. You see, we start seed at the greenhouse, like most of you we are there only one day a week so they don't get pampered like seeds we plant at home. We have always started more seeds than requested to account for die-off.

This allows us to offer plants to projects like Samaritan House, Lance Jepson's community garden project, Tammy's project in Arlington, Eleanor's Saturday demo, and our own community garden demonstration beds.

We start the seeds in plug trays on syphon mats. Raymond Pierce showed us how to make our syphon trays, helping us save money at the greenhouse.

# School Seeds—cont'd

But once they are bumped up to four inch pots, someone must then make a trip out during the week just to check the watering cycle. Donna Morris, Pat Higgins, Pat Lovejoy, and Sue Kelley have been a few of those extra helpers. Each year we struggle with at least one pest. One year it was the soil gnats, and for two years it has been grasshoppers.

What a great project to be associated with these past six years, supplying seedlings to schools and projects. This year we supplied seven projects with a total of 780, four inch fall vegetable plants.

Our master gardeners helped sort, sterilize, fill with medium, water, bump up, fertilize, label, weed out the eaten/dead, and help load them into their prospective vehicles.

Because of so many of you stepping up to help with the seedlings we are able to offer vegetables to the North Tarrant Food Bank.

Keep your eye out next year in July for our fall school seed starting times.

Ok, I admit it was hard to find pictures with people in them, most of mine are of four inch pots!

**Respectfully,  
Claire Alford Tarrant Co Master Gardener**

F 2	<i>Tradescantia pallida</i>	Purpleheart	22	May-Oct	pink (grown for foliage)	
F 4	<i>Delosperma</i> 'Cooper's Pink'	Ice Plant	6	May-Oct	pink	

Cultural Notes: The perennials are grown in full sun (6 - 8 hours) in raised beds which vary in height from 6 to 24 inches. The soil is primarily clay mixed with composted organic matter. A three-inch layer of mulch helps retain moisture and inhibit weed growth, and an automatic irrigation system provides water to the plants. Tarrant County Master Gardeners and Garden volunteers weed, prune, and otherwise maintain the plantings three times a month. They also evaluate the perennials once a month, recording detailed data on each plant's growth, performance and overall landscape appeal. At the end of the year that data is analyzed to produce this list.

MG Debby Stevenson

MG Lena Goff

MGs Eleanor Tuck and Lena Goff

Darlene Myatt, Nutrition Extension Agent at Texas AgriLife, took pictures of Lena Goff, Debby Stevenson and Eleanor Tuck showing bugs at the Carnival de Salud at the Health Department, Saturday, 10/3/15. Our MGs gave away 13 flats of herbs and veggies which came from the TCMGA Demo Garden, Backyard Vegetable Garden and from Trip Smith at Ft. Worth Botanic Garden.

Also a big hit, were hundreds of seeds brought by Melody Young, 2014 Intern! The seeds were donated by Home Depot in Mansfield.

## NEEDED!!!!!!

### NEW SHARECROPPER EDITOR!

TCMGA is looking for a MG to assume the role of producing the TCMGA Sharecropper newsletter!

It is a wonderful volunteer opportunity that contributes to our organization by utilizing research, technology and word processing skills!

Writing skills are not necessary, but can be a plus!

This person will work with the TCMGA Media Committee to produce the newsletter each publication. It is definitely a team effort and a great way to earn hours!!

Working knowledge of Microsoft Publisher, or equivalent software, is required.

If you are interested in assuming this auspicious role, please contact:

Marilyn Satterfield at  
[fitchfield@yahoo.com](mailto:fitchfield@yahoo.com)

or

Jackie Heidinger at  
[jackieheidinger@verizon.net](mailto:jackieheidinger@verizon.net)

## ATTENTION!

THE SHARECROPPER NEWSLETTER  
WILL NOT BE PUBLISHED IN  
DECEMBER!

PUBLICATION WILL RESUME  
JANUARY 2016

Tarrant County Master Gardener

## Membership/Background Investigation Update

We will started collecting Membership dues at the August monthly meeting. Dues are \$20. If you are over 80 years of age, the dues are \$10. You can pay in cash or by check made out to TCMGA. Dues must be paid by Oct 31, 2015.

Please note that some TCMGA members will owe an additional \$10 for an update to their Background Investigation. This update is required every three years. You will be notified by e-mail if you require a Background update. If you have questions, please call Steve Purdy.

If you have changes in you address, phone number or email, please let Steve Purdy know.

**Steve Purdy - Membership**
